

Dhairya Desai

Mumbai, India | +91 82918 10977 | ddhairyadesai@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

B-Tech Data Science student with hands-on experience in Python-based data analysis, statistical modeling, and visualization. Comfortable turning raw datasets into clear insights using pandas, SQL, and scikit-learn, with a growing foundation in machine learning and database design. Seeking a Data Analyst role to apply analytical and problem-solving skills to real-world business data.

EDUCATION

SVKM's NMIMS – B.Tech in Data Science

Mumbai, India

CGPA: 7.90

Expected Graduation: August 2028

- Relevant coursework: Statistics & Statistical Data Inference, Digital Signal & Image Processing, Machine Learning, Database Design

PROJECTS

Stock Price Time Series Forecasting (TCS) | *Python, statsmodels, yfinance*

- Pulled and analyzed historical TCS (Tata Consultancy Services) stock data using the yfinance API for time series modeling
- Diagnosed series stationarity and applied differencing; used ACF/PACF plots to identify AR and MA orders for ARIMA modeling
- Built and evaluated an ARIMA forecasting model, and separately generated a simulated stock dataset exported to a formatted Excel report with summary statistics

Regression Analysis Pipeline | *Python, scikit-learn, pandas*

- Built an end-to-end regression pipeline covering data preprocessing, feature scaling (StandardScaler), and multicollinearity checks via VIF-based feature selection
- Implemented and compared Ridge and Lasso regression models, evaluating performance using R^2 and MSE
- Used pairplots and exploratory visualizations to support model diagnostics and feature selection decisions

Student Performance Predictor | *Python, Scikit-learn, Streamlit*

- Built a linear regression model to predict student academic performance from behavioral and demographic features (student-mat dataset)
- Developed an interactive Streamlit web app with dropdown-based inputs and deployed it for live use; summarized methodology and results in a presentation

Zorix – Algorithmic Trading Signal Platform | *Python, Streamlit* | *In Progress* | [Live](#)

- Building a web platform that analyzes market data and generates buy/sell indications to support trading decisions
- Deployed a live working version on Streamlit as development continues

TECHNICAL SKILLS

Languages & Tools: Python, SQL, HTML, CSS, JavaScript (Basic), Git & GitHub, Jupyter Notebook, VS Code

Data & Analysis: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Data Visualization

Other: Basic Machine Learning, Database Design & ER Modeling

CERTIFICATIONS

Foundations of Cybersecurity – Google, via Coursera (Aug 2026)

RAG Systems & Agentic Workflows with Pinecone and LangGraph – Board Infinity, via Coursera (Sep 2026)
